Example for headings and sub headings if required:

3-Results and Discussion (Times New Roman 14pt bold)

3-1- Tensile Test (Times New Roman 12pt bold)

3-1-1- Strain (Times New Roman 12pt bold)

Table 1: an example. (Times New Roman 12pt Centered.)

	All table Headings	Times New Roman 12pt bold	
Font	Times New Roman	Times New Roman	Times New Roman
Size	12	12	12
Style	Normal	Normal	Normal
Spacing	All centered		

3-2- Units, terminology and symbols (heading 2, Times New Roman, 12pt)

Acceptable system of units is standard metric (SI). Use consistent spelling in English throughout the paper. Use single quotes and do not use ampersands (&) except as a part of an official name of an organization or company. Use % and not percent. Keep hyphenation to a minimum. Do not end headings with full stops. Leave one-character space after all punctuation.

3-3- Tables and figures (heading 2, Times New Roman, 12pt.)

Number tables and figures consecutively, e.g. Figure 1, Figure 2; Table 1, Table 2. Use (a), (b) to distinguish between individual subjects in composite figures. Each figure and table must have a caption typed in Times New Roman 11 point normal, justified centered stating with capital letter and ending with full stop. Captions are placed above tables and below figures. Leave one spacing line (12 pt.) between table and/or figure and body text. No spacing line between caption and/or table and figure. Always refer to figures as 'Figure' and not Fig.

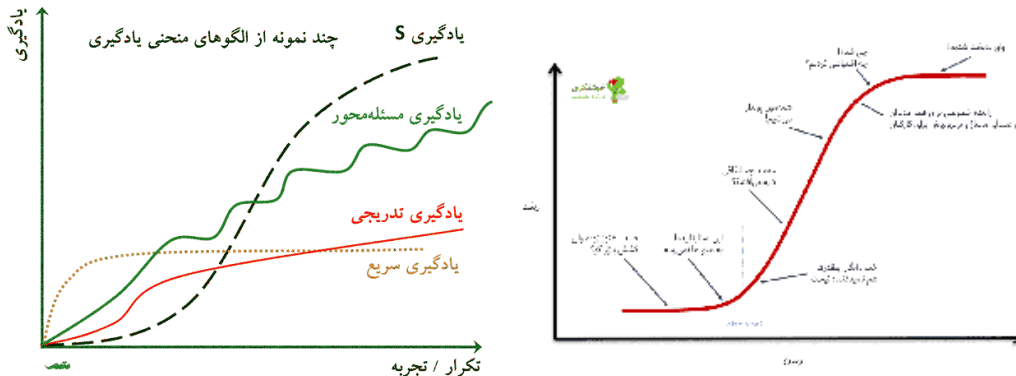

Figure 1. An example. (Times New Roman 12pt., before 0 pt., after 0 pt.)

For text in figures and tables do not use fonts smaller than 12 points font, type must be Times New Roman. Figures and tables that are rotated 90 degrees, have to be read from the right side of the paper. Figures and tables have to be inserted in the text, not at the end of paper. Pictures must be original photographs of good quality and printed with high contrast.

3-3- Mathematical expressions (heading 2, Times New Roman, 12pt,)

Mathematical expressions are justified left and numbered in brackets at the right margin. Make one carriage return before and after the equation, see following example:

$$3\omega y + 9 x^2 = \text{Sin } \alpha \quad (1)$$

3-4- Lists (Times New Roman, 12pt)

Single space items with no spacing marked either by solid bullets ‘•’ or with an Arabic numeral followed by a full stop, e.g. 1. 2. 3.

1- Conclusions

Times New Roman 12 point normal.
